## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a–z, A–Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

#### *Input Format*

The input contains a single line containing a sentence S.

#### *Output Format*

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### ***Answer***

```
import java.util.*;
class Main {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String sentence = sc.nextLine();
        String[] words = sentence.split(" ");
        StringBuilder sb = new StringBuilder();
        for(String w : words){
            if(w.matches("[a-zA-Z]{2,}")){
                if(sb.length() > 0) sb.append(" ");
                sb.append(w);
            }
        }
        if(sb.length() == 0) System.out.println("No valid words.");
        else System.out.println(sb.toString());
    }
}
```

***Status : Correct***

***Marks : 10/10***
